How do I install Adobe Creative Cloud applications on my University computer?

Tell Me

Note

The instructions below are for people downloading onto university owned, ITS managed computers. There are exceptions:

1. If you are a Windows user in College of Engineering (COE) or Housing and Residence Life (HRL), ask your IT department.
2. If you are a Mac user in the Student Union, Activities & Recreation (SUAR), contact your IT department.
3. If you are using a Belk College of Business laptop, contact your IT department.

We recommend a hard wired connection when installing applications.

Follow these instructions for downloading onto university owned, ITS managed computers:

<table>
<thead>
<tr>
<th>Windows</th>
<th>Macintosh</th>
</tr>
</thead>
</table>

1. Go to Start > All Apps (Programs) > Microsoft System Center > Software Center

2. Click on the application you would like to install and click Install on the next screen.

3. Click Install
4. Go to Start > All Apps (Programs) to access the application
5. If you had previously installed a different version of the application, you can uninstall the older version.

Note
Requires macOS 10.9 or greater
Instructions for upgrading your macOS to El Capitan can be found here.

Adobe Creative Cloud will be available through the Self-Service application.

1. Go to Finder > Applications and open Self Service

2. Click Install on each application you would like to install.

3. If you had previously installed a different version of the application, you can uninstall the older version.

Info
Applications can take several minutes to install. You can continue to work on your computer during the installation process.
