How do I request software to be installed on a classroom computer?

Tell Me

UNC Charlotte faculty, staff, or special event organizers may request software for any of the computer classrooms managed by AISLE. To request installation of new software, follow the steps below:

1. Read the installation guidelines.
2. Fill out and submit the Computer Classroom Software Form.

You can request software in any room that is not in the room list by checking "Other" and entering the building and room number in the "Other software information/documentation" text box at the end of the form.
