Why do I need to upgrade my university macOS computer to Mojave?

Tell Me

1. Apple upgrades its OS once a year and adds a variety of feature enhancements that improve usability and performance.
2. Mojave was released in September 2018 and has been tested by ITS against core university systems.
3. ITS is working to make this upgrade available in January 2019.
4. These smaller version upgrades are less disruptive than the former large operating system changes.
5. ITS plans to release version updates 1-2 times a year.
