How do I specify that students use the Respondus LockDown Browser in a Canvas quiz?

Tell Me

You can specify to use the Respondus LockDown Browser with a Canvas quiz. To do so, create the quiz as usual and use the Respondus tool to set up the requirements.

**ALERT!**

If students are employees of UNC Charlotte, they will need to authenticate using their phone or tablet via DUO.

1. Click the quiz link
2. On the left side of the page, click the LockDown Browser link
3. In the list, click the drop-down icon for the quiz you want to set up
4. Choose **Modify Settings**

5. Select the **Require Respondus LockDown Browser for this exam** option

6. Click the **Advanced Settings** link

7. If you want students to be able to use a screen reader, select the **Allow specific students to access this exam with screen readers (e.g. JAWS, Window-Eyes)** option

8. Enter the usernames of the students who you want to have access to a screen reader

   **Warning!**
   
   If you leave this area blank, everyone in the course can use a screen reader. However, if you only want specific students to use a screen reader, you must enter the student's NinerNET user name

9. Select any other options you want to enable for the quiz
10. Click **Save and Close**
