</table>

**Tip**

A change in email can be difficult, especially at first. Please explore and use the features of Gmail exclusively for at least 30 days before considering going back to a desktop email client. Thunderbird, Outlook and Apple Mail do not offer the full search, integration and ease of use found by using a supported web browser with Google Gmail.

---

**IT Support**

The University's ITS Department provides limited technical support for those electing to use an IMAP client to retrieve Gmail. Support includes best effort IT phone support (no ticket escalation) and the FAQs shown. Individual colleges/departments may provide additional support. The College of Liberal Arts & Sciences (CLAS) IT does not support IMAP email clients.
5. Click on Manual setup or additional server types

4. When prompted to add an email account, select Yes and click Next

6. Click Next

5. Your name and email address will appear. Select Manual setup and click Next

7. Click IMAP

8. Click Next

9. Enter Your Name

10. Enter Email Address

11. Under Server Information, Account Type click on the drop down arrow and choose IMAP

12. Incoming mail server: imap.gmail.com

13. Outgoing mail server (SMTP): smtp.gmail.com

14. Enter your full email address (user@uncc.edu)
15. Enter your NinerNET password

7. Select IMAP and click Next

16. Click on More Settings
17. Click on Outgoing server
18. Check My outgoing server (SMTP) requires authentication

8. Enter Your Name
9. Enter Email Address
10. Under Server Information, Account Type click on the drop down arrow and choose IMAP
11. Incoming mail server: imap.gmail.com
12. Outgoing mail server (SMTP): smtp.gmail.com
13. Enter your full email address (user@uncc.edu)
14. Enter your NinerNET password

15. Click on More Settings
16. Click on Outgoing server
17. Check My outgoing server (SMTP) requires authentication

19. Choose Use same settings as my incoming mail server
20. Click on Advanced
21. Incoming server (IMAP): 993
22. Use the following type of encrypted connection: SSL
23. Outgoing Server (SMTP): 465 or 587
24. Use the following type of encrypted connection: SSL

25. Click OK
26. Click **Next**
27. Click **Finish**

1. Your folders and email will start populating. Depending on the size of the email box, this may take some time.

18. Choose **Use same settings as my incoming mail server**
19. Click on **Advanced**
20. **Incoming server (IMAP):** 993
21. **Use the following type of encrypted connection:** SSL
22. **Outgoing Server (SMTP):** 465 or 587
23. **Use the following type of encrypted connection:** SSL

![Image of email settings]

24. Click **OK**
25. Click **Next**
26. You may get an error message. Check your email and click the link in the message from Google to **allow access to less secure apps**

![Image of error message]

**Are you the one who tried signing in?**

Google will continue to block sign-in attempts from app you're using because it has known security problems or is out of date. You can continue to use app by **allowing access to less secure apps**, but this may leave your account vulnerable.

Best,
The Google Accounts team
27. Click **Turn on** and return to Outlook and click **OK** on the error message.

28. Enter your full email address and NinerNET password and click **OK**.

29. Click **Close** when shown test email confirmation.

30. Click **Finish**

   1. Your folders and email will start populating. Depending on the size of the email box, this may take some time.
