How do I configure Outlook email client in IMAP mode to work with Gmail in Windows?

Show Me

Tell Me

1. Enable IMAP on your Gmail account
2. Open Outlook 2013
3. Click the File menu
4. Under the Info tab, click Add Account
5. Click on Manual setup or additional server types

IT Support

The University's ITS Department provides limited technical support for those electing to use an IMAP client to retrieve Gmail. Support includes best effort IT phone support (no ticket escalation) and the FAQs shown. Individual colleges/departments may provide additional support. The College of Liberal Arts & Sciences (CLAS) IT does not support IMAP email clients.

Tip

A change in email can be difficult, especially at first. Please explore and use the features of Gmail exclusively for at least 30 days before considering going back to a desktop email client. Thunderbird, Outlook and Apple Mail do not offer the full search, integration and ease of use found by using a supported web browser with Google Gmail.
6. Click **Next**

7. Click **IMAP**
8. Click **Next**
9. Enter **Your Name**
10. Enter **Email Address**
11. Under **Server Information, Account Type** click on the drop down arrow and choose **IMAP**
12. **Incoming mail server:** imap.gmail.com
13. **Outgoing mail server (SMTP):** smtp.gmail.com
14. Enter your full email address (user@uncc.edu)
15. Enter your NinerNET password
16. Click on **More Settings**
17. Click on **Outgoing server**

4. When prompted to add an email account, select **Yes** and click **Next**

5. Your name and email address will appear. Select **Manual setup**

6. Select the **Change account settings** option and click **Next**
18. Check My outgoing server (SMTP) requires authentication

19. Choose Use same settings as my incoming mail server

20. Click on Advanced

21. Incoming server (IMAP): 993

22. Use the following type of encrypted connection: SSL

23. Outgoing Server (SMTP): 465 or 587

24. Use the following type of encrypted connection: SSL

25. Click OK

26. Click Next

27. Click Finish

a. Your folders and email will start populating. Depending on the size of the email box, this may take some time

7. Select IMAP and click Next

8. Enter Your Name

9. Enter Email Address

10. Under Server Information, Account Type click on the drop down arrow and choose IMAP

11. Incoming mail server: imap.gmail.com

12. Outgoing mail server (SMTP): smtp.gmail.com

13. Enter your full email address (user@uncc.edu)

14. Enter your NinerNET password

15. Click on More Settings

16. Click on Outgoing server

17. Check My outgoing server (SMTP) requires authentication

18. Choose Use same settings as my incoming mail server

19. Click on Advanced
20. Incoming server (IMAP): 993
21. Use the following type of encrypted connection: SSL
22. Outgoing Server (SMTP): 465 or 587
23. Use the following type of encrypted connection: SSL

24. Click OK
25. Click Next
26. You may get an error message. Check your email and click the link in the message from Google to allow access to less secure apps

27. Click Turn on and return to Outlook and click OK on the error message

28. Enter your full email address and NinerNET password and click OK
29. Click Close when shown test email confirmation

30. Click Finish
   a. Your folders and email will start populating. Depending on this may take some time
