What systems are used to manage university computers?

Tell Me

1. University computers are “managed” by IT staff and may act differently than a personal computer.
2. IT staff manage devices in accordance with the university Guideline for Security of Endpoints.
3. Computers are managed in order to maximize performance and minimize security risk.
4. Windows computers are managed using Microsoft’s Software Center and Configuration Manager (SCCM).
5. Mac computers are managed using JAMF.
6. Linux computers are not being uniformly managed.
