How do I test for DMARC compliance when I am working with a third party vendor to send mass emails from an @uncc.edu account?

Tell Me

We recommend you work with IT when initially starting out with the vendor. We want to make sure the software is configured correctly. Please see this FAQ.

1. Have the vendor send a few test emails.
   a. Open the test email in Gmail
   b. Select the 3 vertical dots in the top right of the email pane, and select show original.
   c. This will show the status of the emails SPF, DKIM, and DMARC compliance.
   d. See screenshot below.
