Tell Me

1. The best method really depends on multiple factors and the group settings. Some groups allow you to post while others may not.
   a. Examples of why a certain interface may be used:
      i. **Gmail**: When you want to easily send an email to a group and know the group name/address.
      ii. **Google Group**: When you want to send anonymously as the group or desire a more collaborative experience.
