How do I search for emails from someone who has a regular email address and an alias?

Tell Me

It can be difficult finding all the emails from someone who has a standard @uncc.edu email address and an email alias. Standard searches will typically search for one email address. You can search for both by following the instructions below:

1. Go to \textit{gmail.uncc.edu}
2. Log in with your NinerNET credentials
3. In the search bar at the top of the screen, type in \texttt{from:(FirstName LastName)} for example in the search box type from: jane smith

4. Hit \texttt{Enter} or click the \texttt{Search} icon
5. The results will show all email from the username, jsmith1@uncc.edu and jane.smith@uncc.edu
