What are the default settings for room resources in Google Calendar?

Tell Me

1. Room resource calendars have a few configuration options that are not available to personal calendars.

   - **Auto-accept Invitations**
     - Calendars for resources like conference rooms can automatically accept invitations from people with whom the calendar is shared when there are no conflicting events.

2. Room resources can:
   a. **Auto-accept invitations that do not conflict** - this only accepts invites when there is no conflict with a previous request.
   b. **Automatically add all invitations to this calendar** - if this setting is chosen, conflicts can happen.
   c. **Do not show invitations** doesn't work for room resources.

3. By default, all room resources will be configured to **Auto-accept invitations that do not conflict**.
4. Room resource permissions will also be migrated.
5. The management of the room will be given to the person who has the highest level of permission for the room resource.
