How do I create an In-Video Quiz in a YouTube Video using Kaltura?

Tell Me

Kaltura My Media provides faculty with the option to post YouTube videos which can then be embedded into Canvas items (Pages, Announcements, Discussion forums, etc.). Kaltura’s Interactive Video Quiz (IVQ) tool can be used to increase the power of your YouTube video by embedding questions directly into the video. The IVQ feature increases engagement, enables effective assessment measurement, and provides a new way to improve learning outcomes. IVQ provides an easy-to-use quiz creation wizard to create an unlimited number of true/false and multiple choice questions with 2-4 optional answers per question for your course video quiz assignment.

1. Login to Canvas
2. Access a course in which My Media is enabled

Canvas Course Navigation
Please view the Canvas How do I reorder and hide Course Navigation links? for help enabling My Media

3. Click the My Media link

4. Click the Add New drop-down button
5. Select YouTube
6. Navigate to the YouTube video clip you would like to use. Copy the URL.

7. In My Media, paste the YouTube URL into the box provided and select "Preview".

Note: Kaltura will cut off everything except the ending unique video identifier of the URL you pasted.
8. You will see how the YouTube video will appear in **My Media**

```
YouTube
```

```
Video Page Link (or Content ID)
```

```
Note: Only public YouTube videos are supported
```

```
Preview
```

9. Click on the video to see the details associated with the YouTube video

```
Please fill out these details:
```

```
Name: Finding Ethnographic Sources
```

```
Description: This video shows you how to find ethnographic sources using the library’s search system.
```

```
Tags: 
```

```
Complete all the required fields and save the entry before you can select to publish it to categories or channels. Note that the upload process needs to complete successfully for the “Published” option to be enabled.
```

```
Private - Media page will be visible to the content owner only.
```

```
Published - Media page will be visible to individuals according to entitlements on published destinations
```

10. You will see that the **name** and **description** of the video that were used in YouTube have been placed here for your convenience. You can edit these accordingly. Click **Save**.

Please note that YouTube videos do not have the same options available as media files uploaded to Kaltura. For example, you will not have the features for clipping and trimming. Machine and Human Closed Captions can be requested for these YouTube videos in Kaltura My Media. You can also add SRT files to the YouTube video. The YouTube video can be published to the Media Gallery or embedded into Canvas Pages.
