How can I get an HTML embed code to share my Kaltura Video?

Tell Me

EmbedCode

An "HTML embed code" is a block of HTML which is embedded into a web page and creates an interactive object in doing so. For example, you can add the Kaltura video embed code to your Google Website to share the content with your students.

1. Click your My Media link in your Canvas course

2. Click the link on the name of the video you want to generate an HTML embed code

3. Click on the Share button found below the video
4. The HTML Embed code will appear including options to choose from

a. 1 - Choose a Start and End Time to play the video
b. 2 - Change the formatting for the Player Skin
c. 3 - Change the Player Size

5. Copy the HTML embed code link to share

6. You can now paste that code in your web page, Canvas Pages or any application that will be able to show that interactive code
