What vulnerability management tools are used at UNC Charlotte?

Tell Me

- UNC Charlotte uses Rapid 7 InsightVM on endpoints and Acunetix Web Application Security tool
  - Rapid 7 Insight VM agent:
    - Runs on university devices.
    - Is lightweight and has a small footprint.
    - Provides real-time monitoring scans of the endpoint and sends the information to a central log server.
    - Helps computing device administrators know about endpoint vulnerabilities so that the vulnerabilities can be mitigated.
    - The agent is found by looking in Add/Remove programs.
    - If you are unsure whether or not this agent is running on your computer or have additional questions, please contact the IT Service Desk at 704-687-5500 or help.uncc.edu.
- Acunetix Web Application Security is used by ITS to scan web applications.
  - Risks are identified and administrators notified to mitigate the risks.
  - If you have questions or need additional assistance, contact the IT Service Desk, help.uncc.edu or 704-687-5500.
