What are the differences between Google Groups and Listserv?

Tell Me

1. Below is a table showing common functionality and features used for Listservs and Google Groups.

<table>
<thead>
<tr>
<th>Listserv</th>
<th>Google Group</th>
</tr>
</thead>
<tbody>
<tr>
<td>Listserv had owners and subscribers</td>
<td>Google Groups allow for owners, managers, and members of the Group. ITS is considered the owner of Google Groups</td>
</tr>
<tr>
<td>Listserv owners were migrated as managers and subscribers are now members</td>
<td></td>
</tr>
<tr>
<td>Listserv can't be invited to calendar events</td>
<td>Groups can be invited to calendar events; everyone that's a member of the group will get an invitation</td>
</tr>
</tbody>
</table>
