What is eGA (electronic graduate assistantship)?

Tell Me

eGA is the online “electronic graduate assistantship” application platform. It is how a department or faculty member can initiate and nominate a graduate assistant, generate a contract for the student, and send the appointment to Human Resources and Payroll. It is the same platform where a student can accept their assistantship/nomination. Everyone with faculty/staff status has access to eGA with their NinerNet login credentials. Additional FAQs for eGA can be found on the ITS website.
