How do I change my video layout to show a grid of participants in a WebEx meeting?

Show Me

Tell Me

In a meeting or event, there are three different video-only layouts: Active Speaker and Thumbnail View, Active Speaker View, and Grid View. There needs to be more than two participants to change to these views.

There is also a Floating Layout. Floating Layout is a fullscreen mode that allows you to move and resize the panels.

1. To change the view, select the Active Speaker and Thumbnail View (1) or the Floating View (2) icon at the top right corner of your screen.

2. When clicking the Active Speaker icon, the section menu expands allowing you to select a different view.
   a. Active Speaker View
   b. Active Speaker and Thumbnail View (default)
   c. Grid view
