

How can I create a presentation in Kaltura Capture?

Tell Me

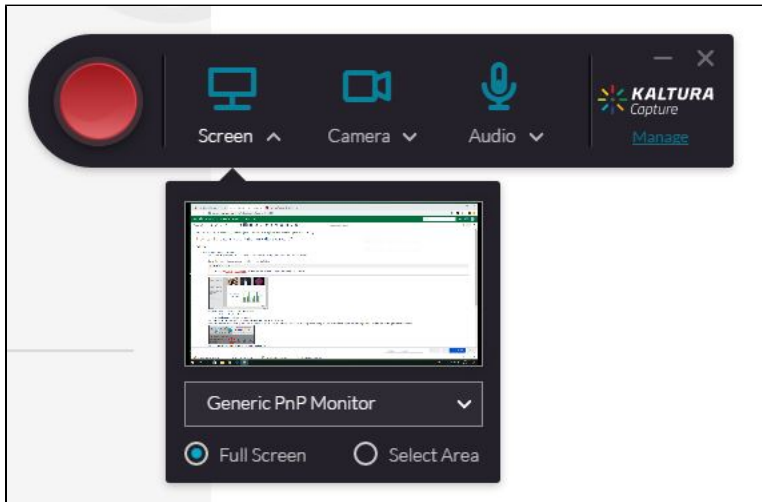

Recommendations

There are several factors that affect **student engagement in online instructional videos**.

1. **Shorter videos** are more engaging (4-6 minutes)
2. **Video engagement** is important - speak directly to your students in your presentation
3. **Use your voice** to bring excitement, interest, and understanding of the content
4. **Be concise** - use a script to guide your presentation - reduces cognitive load for learning
5. **Show yourself** periodically in the video speaking to your students (supports engagement)
6. **Utilize screen capture** or writing content (facilitating the learning)
7. Recorded classroom lectures (30 mins - 1 hour) **should be chunked** (broken up into several videos) for clarity and engagement
8. Don't use video to lecture to your student; utilize **tutorials or case studies** to engage them on the content
9. **Utilize other content** (videos, text, audio, simulation, case studies) in support of your video for clarity and understanding

1. Record a Multi-Source Presentation

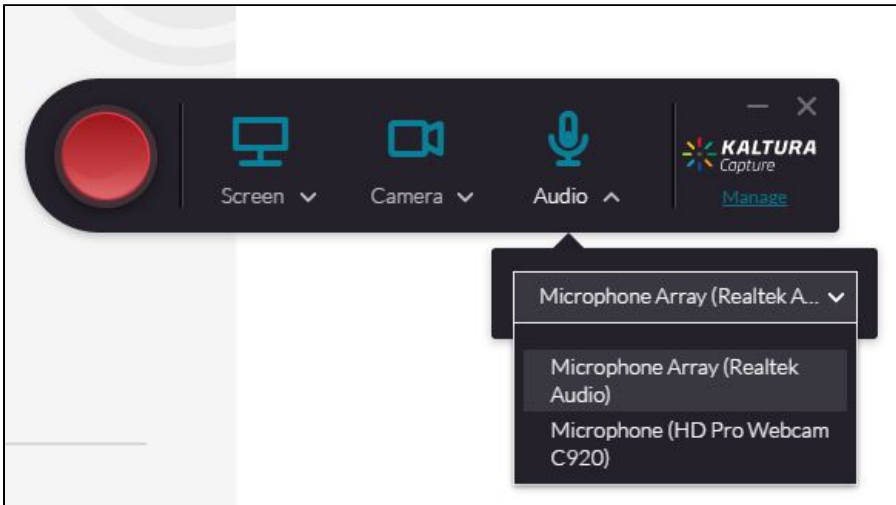

- a. Click on the **Screen** drop downs to select your recording sources (full screen, select areas, web-camera, etc.)

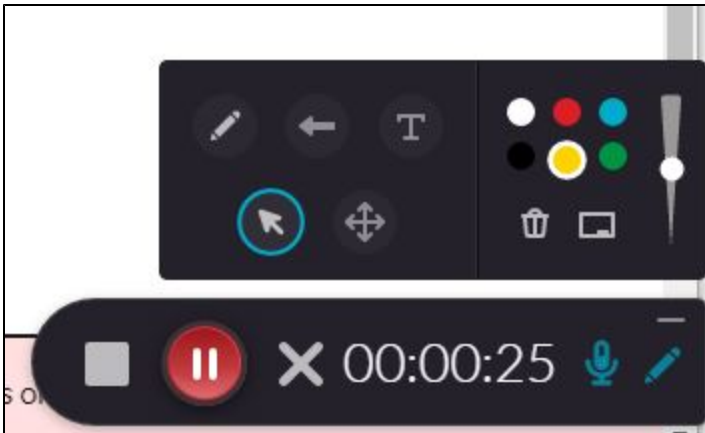

- b. Select the number of screen sources you intend to use (up to two) - one should be the screen displaying your presentation, a second source could be a web-camera or another screen source

MAC Users!

When using the Kaltura Capture Desktop Recorder on a Mac, you can only choose one camera

- c. Select the **Audio** source
- d. Click **Record**. A 3 second countdown is displayed and the recording begins
- e. Click the **Pencil Icon** to activate the drawing tools. The drawing tools can be used to draw freely on the screen during the recording. You can stress important points by drawing a circle around them, or highlight important aspects

- f. Click the large **X** when you are finished recording the presentation
