

# How can I specify that a Kaltura video in Canvas can be downloaded?

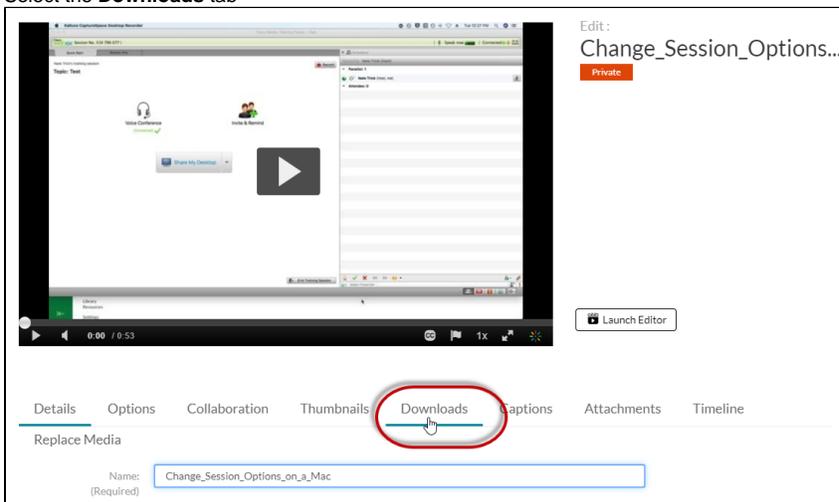

## Tell Me

By default, videos in Kaltura cannot be downloaded by users. If you want someone to be able to download your videos, follow the directions below. Note that videos that are closed captions will be downloaded without captions. The captions can be downloaded separately as a text file.

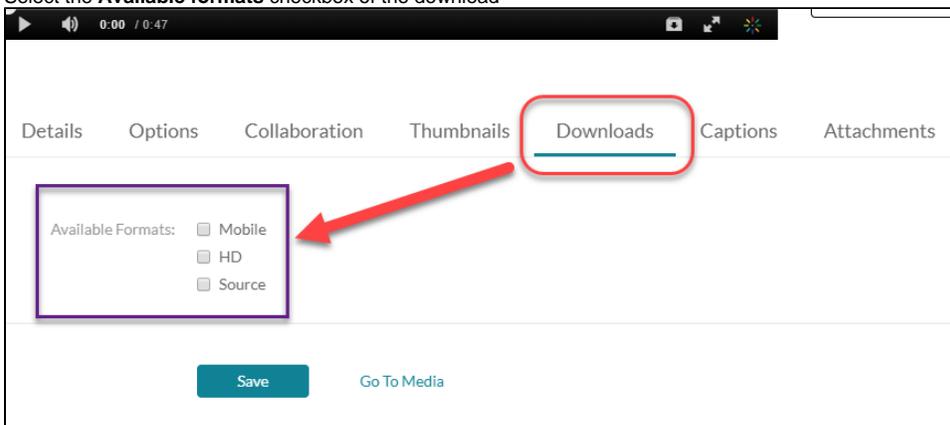

1. Access your course in **Canvas**
2. Either create or upload your video to **My Media**
3. To the right of a particular video you want to make downloadable, click the **Edit** (pencil icon) button

4. Select the **Downloads** tab

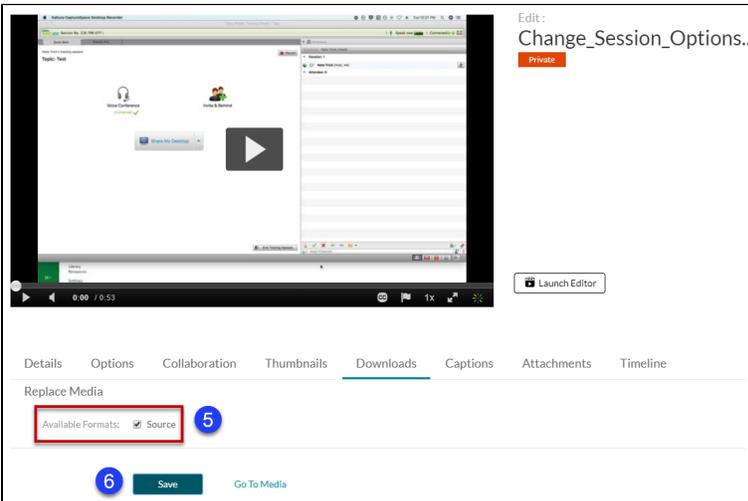

5. Select the **Available formats** checkbox of the download

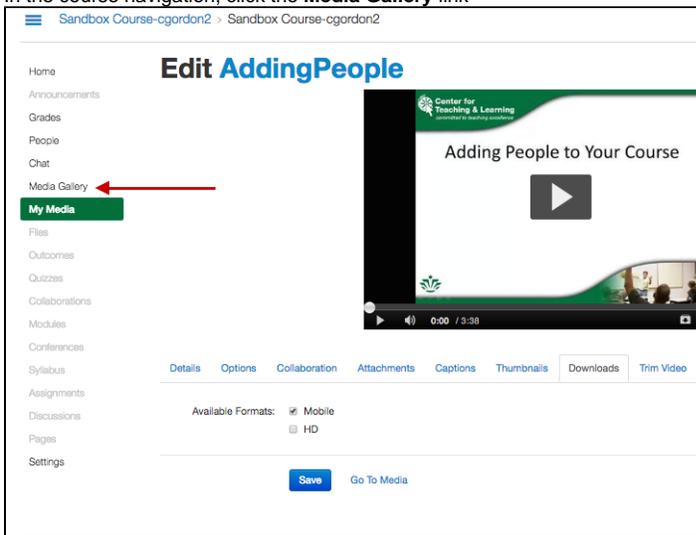

- a. **Mobile:** For tablet or Smartphone
- b. **HD:** High Definition version of the video
- c. **Source:** Source video file

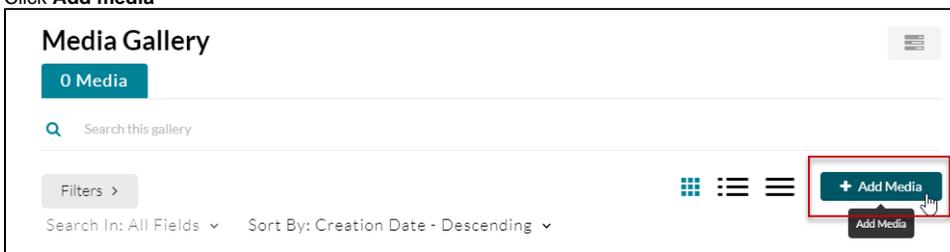

6. Click **Save**

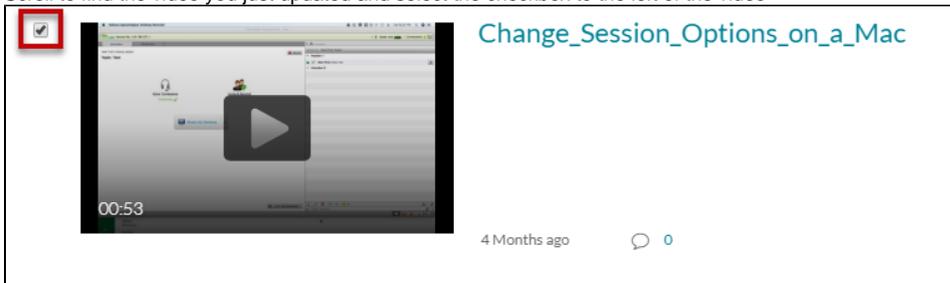

7. In the course navigation, click the **Media Gallery** link

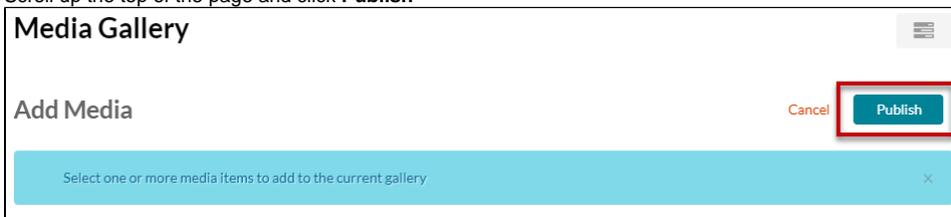

8. Click **Add media**

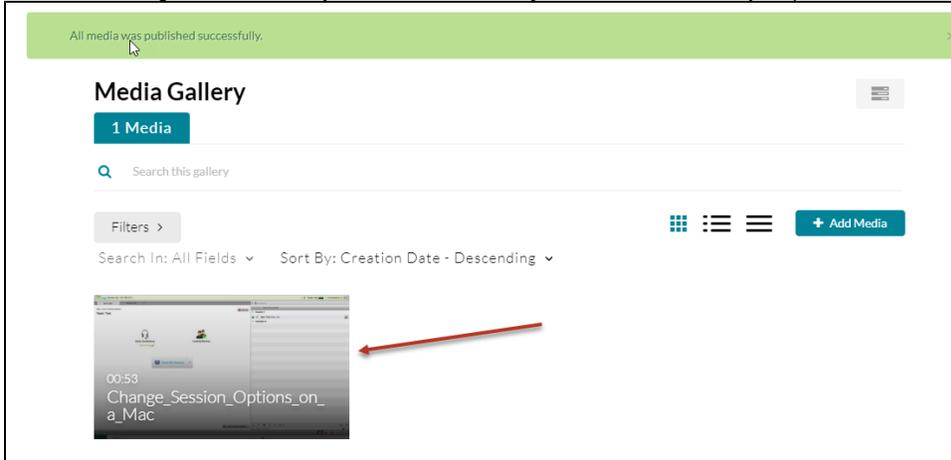

9. Scroll to find the video you just updated and select the checkbox to the left of the video

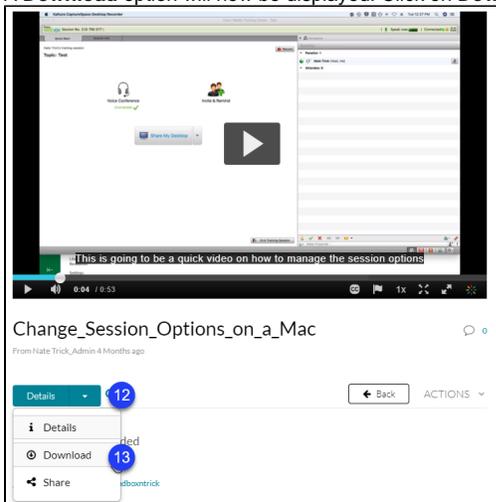

10. Scroll up the top of the page and click **Publish**

11. You see a message **All media was published successfully**. The video is added to your published selections

12. When students click your video in the Media Gallery, a **Details** drop down is displayed. Click the **Details** drop down
13. A **Download** option will now be displayed. Click on **Download**

14. When students click **Download**, the area expands to display the options you chose. Students need to click the **Download icon** to download the video

If you do not see any options for download, go back to Step 5 and select all options available. You should always be able to download the Source video.

15. The captions for the video will not be part of the downloaded video
16. To get the captions as a text file, click **Download**

17. Choose **Attachments**

The screenshot shows the 'Attachments' page with a search bar and a 'Back' button. A dropdown menu is open, showing options: 'Details', 'Attachments' (circled in red), and 'Download'. Below the menu is a table with columns: Title, Description, Size, Uploaded At, and Actions.

Title	Description	Size	Uploaded At	Acti
transcript_en		3.79 Kb	Jul 10, 2018	
c24Trans_en	c24Trans_en	154.48 Kb	Jul 10, 2018	

18. Under the **Actions** column, click the download icon to download the caption text file

The screenshot shows the 'Attachments' page with a search bar and a 'Back' button. The table has columns: File Name, Title, Description, Size, Uploaded At, and Actions. The 'Actions' column for the first row contains a download icon (circled in red).

File Name	Title	Description	Size	Uploaded At	Actions
transcript_en.txt	transcript_en		3.79 Kb	Jul 10, 2018	
c24Trans_en.json	c24Trans_en		154.48 Kb	Jul 10, 2018	

**i** **Download from Media Gallery**

The Download option is only available to students in the **Media Gallery**. While you can still add your video to a specific area of the course, if you want students to be able to download it you need to include that information in the description. Alternately, you can add a course link that takes them directly to the Media Gallery. If the video was closed captioned, the captions will not appear on the video.
