Admissions Trends and Competitiveness

You can find and explore the most recent public information on UNCC admissions trends at https://ir-analytics.uncc.edu/tableau/admissions-trends-5-year-dashboard. Additional trends – such as enrollment and graduation trends – are publicly available at https://ir-analytics.uncc.edu/ thanks to UNCC’s Institutional Research Analytics.

The charts below are from the above sources.

- Circa 2021, our program’s capacity is approximately 450 total students. (The Admissions charts below show only newly admitted students per semester.)
- The number of new admission openings in a semester depends primarily on how many students graduate that semester.
  - For example, if we have an unusual semester, and only 75, students graduate, we will only have approximately 75 openings for new students.
  - Or for example, if we have an unusual semester, and only 325 students are originally enrolled, and 75 graduate, we will have approximately 200 openings for new students.
