How do I create an In-Video Quiz in a YouTube Video using Kaltura?

Tell Me

Kaltura My Media provides faculty with the option to post YouTube videos which can then be embedded into Canvas items (Pages, Announcements, Discussion forums, etc.). Kaltura’s Interactive Video Quiz (IVQ) tool can be used to increase the power of your YouTube video by embedding questions directly into the video. The IVQ feature increases engagement, enables effective assessment measurement, and provides a new way to improve learning outcomes. IVQ provides an easy-to-use quiz creation wizard to create an unlimited number of true/false and multiple choice questions with 2-4 optional answers per question for your course video quiz assignment.

1. Login to Canvas
2. Access a course in which My Media is enabled

3. Click the My Media link

4. Click the Add New drop-down button
5. Select YouTube
6. Navigate to the YouTube video clip you would like to use. Copy the URL

7. In My Media, paste the YouTube URL into the box provided and select “Preview”
8. You will see how the YouTube video will appear in My Media

![YouTube video interface]

9. Click on the video to see the details associated with the YouTube video

![Video details interface]

10. You will see that the name and description of the video that were used in YouTube have been placed here for your convenience. You can edit these accordingly. Click Save.

![Save button highlighted]

Go To Media Go To My Media
11. Your changes will be saved. Click Go To My Media to see the posted YouTube video.

12. From My Media, click the Add New drop-down menu and choose Video Quiz from the list.

13. In the Media Selection window, click the Select button to choose the video that you want to create an associated quiz.

14. After you select your video, the MediaSpace window will automatically load the video and open the Quiz Editor's General window.

15. You will now be able to start editing the quiz options and add multiple choice and true false questions using the IVQ Editor to build out your video quiz.
Please note that YouTube videos do not have the same options available as media files uploaded to Kaltura. For example, you will not have the features for clipping and trimming. Machine and Human Closed Captions can be requested for these YouTube videos in Kaltura My Media. You can also add SRT files to the YouTube video. The YouTube video can be published to the Media Gallery or embedded into Canvas Pages.
