How does the question & answer feature work in Zoom webinars?

**Tell Me**

1. The Question & Answer (Q&A) feature for webinars allows attendees to ask questions during the webinar and for the panelists, co-hosts and hosts to answer their questions.
2. With the public Q&A feature, attendees can answer each other’s questions and, if enabled, they may also upvote each other’s questions.
3. See this Zoom article for more details.

A limited number of Zoom Webinar licenses are available to Faculty & Staff. See this FAQ for information on requesting a license.
